FUTURE NEURO PUBLIC & PATIENT INVOLVEMENT INFORMATION DAY

Engage with us

St Stephen's Green, Dublin
11am-1pm

APRIL

13th

2024

About Us

FutureNeuro is the Science Foundation Ireland (SFI) Research Centre for Chronic and Rare Neurological Diseases. We aim to change the patient journey through research informed by the needs of both patients and neurologists. This includes developing rapid and accurate tools for diagnosis, the development of therapies to modify brain networks, technologies to enable patients to monitor their own health and well-being, and linking this to Ireland's national imaging, diagnostics and eHealth infrastructure.

Our Vision

Enable people with Neurological Diseases to
live independently

Our Mission

Faster Diagnosis, Personalised Treatments
and Patient-Centred Care

WHAT'S ON.....

111AM

An Introduction to FutureNeuro: what we work on, our past breakthroughs and upcoming research

11.30am-1pm

Meet our researchers and clinicians: take time to talk to some of our researchers and clinicians at the cutting edge of neurological research in Ireland about their work on:

- **Gene Therapy and Neuro Technology**
- **Patient Registers and Clinical Trials**
- **New Therapeutic Approaches to Multiple Sclerosis**
- **New Research on Parkinson's Disease**
- **New Research on Rare Epilepsies**
- **Using Electronic Patient Data to Improve Care**

Have a particular interest?

Take your interest further: Would you like to get involved in some of our projects as a Patient and Public Involvement collaborator?

This event is free to attend but please register in advance

Location: Royal College of Surgeons in Ireland, 13 April, 11am-1pm

Registration: now open

registration Closes: 8th April
